

Christopher Voit

Senior Fullstack Engineer · human-centered product engineering

Munich, Germany · +49 176 61962733 · hello@christophervoit.de · linkedin.com/in/cvoit · German (native), English (C2)

I am Chris, a Senior Fullstack Engineer with an HCI background and a passion for building products that feel “just right”. As one of three engineers at adtribute, I own, end to end, the web platform that serves 60+ e-commerce brands and ingests data from 40+ integrations. My biggest project this year: building the dashboarding platform from scratch.

Skills

● Languages	TypeScript, JavaScript
● Frontend	React, Next.js, TanStack Query, Tailwind CSS, data visualization · also Angular
● Backend & data	Node.js, Fastify, PostgreSQL, Prisma, REST API design
● Cloud & DevOps	GCP, Docker, GitHub Actions (CI/CD), Git · also Azure, AWS
● Testing	Vitest, Playwright, Cypress, end-to-end, integration and unit testing
● Agentic engineering	Claude Code with custom skills for every step from prototyping to review, multi-agent spec & code reviews, automated lint and test loops, quality gates locally and in CI, PR descriptions as long-term memory via git blame
● UX & research	Contextual Design, user and domain-expert interviews, Figma and AI-driven prototyping, think-aloud testing, heuristic evaluation, accessibility audits, Storybook design systems

Experience

Senior Fullstack Engineer · adtribute.io

Jul 2026 – Present

Fullstack Engineer · adtribute.io

Jun 2025 – Jul 2026

Remote · bootstrapped B2B SaaS for e-commerce data · Full-time · rejoined in Jun 2025 · **Stack:** TypeScript, React, Next.js, TanStack Query, Tailwind CSS, Node.js, Fastify, Prisma, PostgreSQL, GCP, Docker, GitHub Actions, Vitest, Playwright

- Designed and built the dashboarding platform from scratch, with drag-and-drop layouts, period comparison, filters, breakdowns and drill-down.
- Rebuilt the workspace where teams define their metrics, formulas and attribution rules.
- Redesigned the navigation around dashboards, with draggable sections and 🔍 search.
- Moved the web app to a new frontend architecture and rebuilt the Chrome extension.
- Set up the frontend test system, including browser integration tests and agent-driven E2E test capabilities
- Introduced feature flags, and maintain CI/CD and production monitoring on GCP.

Software Engineer · MaibornWolff

Jan 2024 – May 2025

Munich · IT consulting for med-tech and public-sector defense clients · Full-time · **Stack:** TypeScript, React, Angular, Storybook, Tailwind CSS, Cypress, Azure, Docker

- Worked as a frontend engineer on a med-tech client project and mentored a working student through development and code reviews.
- Owned the project's Storybook design system and set up its Cypress end-to-end test suite.
- Designed the API contract between frontend and backend for data operations and file processing.
- Re-architected a large legacy application into modular, declarative components, reducing bugs and increasing team velocity.
- Co-developed a map-based data-visualization tool in an R&D project for a public-sector defense client, from external data integrations to containerized deployment.

Experience (continued)

Backend Engineer · adtribute.io

Nov 2023 – Jan 2024

Remote · bootstrapped B2B SaaS for e-commerce data · Full-time · **Stack:** TypeScript, Node.js, GCP

- Integrated Shopify, Klaviyo and Meta Insights data into the ETL pipeline.
- Refactored and optimized data processing, and added unit tests.

Technical Founding Member · Trail.ai (acquired by Collibra)

Apr 2022 – Sep 2022

Munich · AI-regulation startup, German EXIST grant · Full-time · **Stack:** Figma, Webflow, Streamlit

- Sourced and interviewed 80+ experts with Contextual Design to shape the product.
- Built paper, Figma and low-code prototypes and designed pitch decks for funding.
- Developed pricing, market-entry and financing strategy.
- Pitched to investors, partners and customers.

Technical Product Manager · Delicious Data

Mar 2021 – Apr 2022

Munich · Food-tech, explainable AI · Working student · **Stack:** TypeScript, React, Figma

- Co-created a concept for explainable-AI features.
- Built a user-specific help center and developed frontend features.

Product Development Consultant · Lilio Health

Oct 2021 – Jan 2022

Munich · Health-tech · Working student · **Stack:** Dart, Flutter, Firebase, Dialogflow

- Gathered user insights with Contextual Design.
- Designed a real-time serverless backend and built a cross-platform app and a Google Assistant skill.

ML Engineering Intern · BMW North America

Oct 2018 – Mar 2019

Mountain View, CA · NLP research · Internship · **Stack:** Python, Flask, scikit-learn, AWS, Android Auto

- Collected and cleaned NLP training data and trained classification models.
- Built Android Auto UI components and a fullstack research app.

Earlier roles · A&L Consulting, Universität Würzburg, denkbares

Feb 2017 – Mar 2020

Würzburg · Web, VR, product · **Stack:** Webflow, Unity, WordPress

- Created VR experiences, Alexa skills and two websites, and wrote end-to-end tests.

Education

M.Sc. Human-Computer Interaction · LMU München · best in class · *grade 1.0*

Oct 2020 – Jan 2024

Honors degree, Technology Management · CDTM (LMU & TUM) · *grade 1.1*

Jul 2021 – Apr 2023

M.A. Responsibility in Science, Engineering & Technology · TUM · discontinued

Oct 2020 – Mar 2021

B.Sc. Human-Computer Interaction · Universität Würzburg · *grade 1.3*

Oct 2016 – Apr 2020

Volunteering & awards

Positive Visions for the Future · hosting a discussion circle on current crises

Jan 2026 – Present

Language partnership · practicing German with refugees every two weeks

Sep 2025 – Present

Deutschlandstipendium · national merit scholarship, LMU München

May 2021 – Apr 2023

#WirVsVirus hackathon · led 15 developers and designers

Apr 2020 – Jun 2020

Signature strengths · top 5 character strengths, VIA Institute on Character

Honesty · *courage*

Judgment · *wisdom*

Creativity · *wisdom*

Forgiveness · *temperance*

Perspective · *wisdom*
